

	Monday 19 April 2010		Tuesday 20 April 2010
		08:30	Registration
09:00	Registration	09:00	<b>Fabien Pfaender</b> An Enactive Semiology based Process to Explore Large Heterogeneous Datasets
09:30	Welcome		
09:40	<b>Alan Winfield</b> The Emergence Engineers' Dilemma	09:40	<b>Bruce Edmonds</b> The Necessity of Post-construction Management for Complex Systems
10:20	<b>Paul Andrews et al</b> Simulation as an experimental design process	10:20	<b>Steve Phelps</b> Biological markets: a catalyst for the major transitions?
11:00	Coffee	11:00	Coffee
11:30	<b>Fiona Polack</b> Validation and simulation	11:30	<b>Liz Varga</b> Engineering of Emergence for a Low Carbon Economy
12:10	<b>Rene Doursat</b> (keynote) Embryomorphic Engineering	12:10	<b>Russell Abbott</b> (keynote) From energy to information and back
13:10	Lunch	13:10	Lunch
14:30	<b>Adam Nellis</b> Emergent evolution allows meta-evolution	14:30	<b>Ognen Paunovski et al</b> Engineering Emergent Properties in Artificial Distributed Systems
15:10	<b>AE Eiben et al</b> Towards New Principles of Unbound Embodied Evolution	15:10	<b>Peter Welch et al</b> To boldly go: occam-pi
15:50	<b>Eilidh McAdam et al</b> Biological Metaphors for Critical Infrastructures	15:50	Coffee
16:30	Coffee	16:20	Panel discussion
17:00	Panel discussion	17:20	Close
18:00	Close
