

Euredit binary tree function: tree_free

1 Purpose

tree_free frees the memory containing a decision tree computed by **anova_tree**, **gini_tree**, or **waid_tree**.

2 Specification

```
#include <euredit_sys.h>
```

```
void tree_free (int root)
```

3 Parameters

root

Input: the integer value of the root node of a decision tree computed by **anova_tree**, **gini_tree**, or **waid_tree**.
